

BRAIN CANCER

KILLS MORE CHILDREN THAN ANY OTHER DISEASE

Rcdfoundation.org

LITTLE PROGRESS HAS BEEN MADE IN THE LAST

30 YEARS

80%

OF CHILDREN DIAGNOSED WITH HIGH GRADE TUMOURS WILL LOSE THEIR BATTLE WITHIN

5 YEARS

CURRENT TREATMENT OPTIONS ONLY HELP

50% OF CHILDREN

90%

OF CHILDREN TREATED ARE LEFT WITH LIFELONG PHYSICAL AND MENTAL IMPAIRMENTS

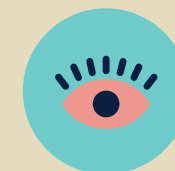

The BRAIN IS WHERE THE HEART Lives

THE BRAIN CONTROLS VITAL FUNCTIONS SUCH AS:

MEMORY & LEARNING

THE SENSES

EMOTIONS

BRAIN CANCER AFFECTS CHILDREN DIFFERENTLY TO ADULTS,

AS THEIR BRAIN IS STILL DEVELOPING, TREATMENTS CAN RESULT IN MORE SUBSTANTIAL AND PERMANENT SIDE EFFECTS THAN THEY WOULD FOR AN ADULT.

THIS IS WHY IT'S SO IMPORTANT TO US TO

Focus

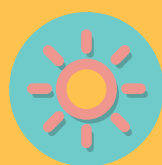

ON PAEDIATRIC BRAIN CANCERS

BRAIN TUMOURS ARE THE MOST COMMON FORM OF SOLID TUMOURS AMONG CHILDREN

EYE CANCER

SKIN CANCER

BRAIN TUMOURS

KIDNEY TUMOURS

BONE CANCER

THERE ARE

150

DIFFERENT TYPES OF BRAIN CANCER

BRAIN TUMOURS IMPACT ALL THESE THINGS, THEY ATTACK MORE THAN THE BODY, THEY ATTACK PATIENTS' MINDS, PERSONALITIES AND WHAT MAKES THEM WHO THEY ARE
